Curriculum vitae and list of publications

Curriculum vitae

Johanna Carolina Visser was born in 1967 (Smallingerland) and studied Pharmacy at the University of Groningen.

After her graduation in 1995 she started working as a pharmacist in a community pharmacy. From 1996 – 1998 she was trained as a specialist community pharmacist. During these years she developed an interest in pharmaceutical compounding. In 1999 she combined her work at the community pharmacy with work as an instructor in practical compounding, at the University of Groningen.

In 2006, after years of working at the community pharmacy, she decided to go back in college to study Scandinavian Languages and Cultures (Swedish). After finishing her master's degree in 2011 she worked as a Swedish language teacher at a language institute. During and after the years in college she continued her work as an instructor in practical compounding.

In 2011 she decided to focus solely on teaching in pharmacy at the University of Groningen. Furthermore, she commenced her PhD research in 2011 at the department of Pharmaceutical Technology and Biopharmacy. Her research focused on the development of a new oral dosage form, the orodispersible film.

Currently she works as a lecturer at the department of Pharmaceutical Technology and Biopharmacy at the University of Groningen
